EHS Management System

Dear Sir or Madam,

Heraeus has implemented an internal EHS Management System which has been designed in accordance with the requirements outlined in ISO 14001 and ISO 45001 (formerly known as OSHAS 18001). The Heraeus EHS Management System (known as the Heraeus EHS Development Path) is a staged excellence initiative which includes global EHS best-practice standards with a powerful toolbox. It consolidates all Heraeus global EHS services, standards, processes, insurance contracts, certain legal requirements, and requirements of ISO 14001 and ISO 45001 into one streamlined program.

It has been reviewed by multinational certification bodies like SGS, TÜV Rheinland, TÜV Süd and DEKRA as a fundamental step for achieving the certification.

The Heraeus EHS Management System is continuously reviewed, further developed, and adjusted accordingly if necessary.

Heraeus sites perform a self-assessment on a regular basis and are required to undergo the Heraeus internal assessment. The latter is managed by Corporate EHS and determines if the sites meet the requirements of the Heraeus EHS Management System.

If you have any questions, please do not hesitate to contact CorporateEHS@heraeus.com.

Yours faithfully,

Dr. Uwe Endruschat

Dr. Anja Teske
